

1. Essential Topic clouds

Cellular & Molecular Biology	Microbial Physiology and Omics	Computational Biology	Structural Biology and Protein Engineering	Biomaterials Engineering	Environmental Biotechnology
Neuroscience	Genomics	Bioinformatics	Structure based drug design	Tissue engineering	Bioenergy
Microtubule biology	Biofilms physiology	Systems Biology	Protein structure determination	Nanomedicine	Microbial fuel cells
Molecular motors	Microbiology of pathogens	Synthetic Biology	Drug targets	Biomechanics	Wastewater treatment
Centrosome biology		Statistical genetics	Protein engineering	Artificial Organs	MFC based biosensors
Drug screening & testing		Personalized medicine		Biomaterials	
Cancer Biology		AI for healthcare		Animal Models	
Immunology				Personalized medicine	
Vaccine development				AI for healthcare	
Identification of novel biomarkers					
Understanding disease development
